Please read in conjunction with **Koorringal High School Assessment Procedures Booklet**.

The Assessment Procedures are located on the school's website as well as through the Year Advisor and Deputy Principal.

This Handbook includes the assessment schedules for each course of study which students are expected to complete.

Periodic assessment is an important way for students to demonstrate that they have successfully achieved the outcomes of the course being studied. Assessment tasks also allow teachers to find out where students are having problems with course work, concepts and skills so that they may intervene if necessary to correct student misunderstanding.

All staff at the school will provide support for students in their learning, or to help inform decisions and to overcome problems should they arise. There are some key staff that will have particular responsibilities and interest in the general well-being of students.

These include:

Classroom teachers
Head Teachers of all faculties
Year Advisor: Mr Mitchell Read
Deputy Principal Year 11: Mrs Helen Schmetzer
Learning and Support Teacher: Ms Anna Swift and Ms Bernadette Howard
Student Support Officer: Mr Josh Larwood and Ms Kelsie Hodges
Careers Advisor: Mrs Kirsten Fitzgerald
School Counsellor: Mrs Sarah Zimmerman and Mr Paul Wetherbee
Principal: Mr Kyle Bryant

Students should feel confident to seek their advice and guidance should question or issues arise, or simply to clarify issues if uncertain.

Parents are also welcome to contact the school if they have concerns regarding their children's academic progress. For general concerns, please contact the Year Advisor. For concerns regarding a particular subject, please contact the Head Teacher of that subject. The Head Teacher's name is listed on the subject assessment schedule.

Mr Kyle Bryant

Koorringal High School Preliminary Assessment Policy

Requirements for the Award of an HSC and Satisfactory Completion of a Course

It is expected that:

- the student's attendance, conduct and progress will be satisfactory
- the student will follow a pattern of study that makes him/her eligible for the award of the HSC
- the student will study appropriate courses as approved by the NESA NSW
- the student will complete all the requirements of each course including any necessary oral, aural, practical, field work, project work, class work
- the student will have completed, and made a genuine attempt at, all tasks required as part of the assessment program
- the student will avoid behaviour which could be considered cheating, including plagiarism, and ensure that all assessment work is their own or acknowledges the contribution of others
- the student will sit for, and make a genuine attempt at, any examination set as part of the course including the Higher School Certificate examination.

The Courses

Two types of courses are approved for study in the Higher School Certificate:

- NESA Board Developed Courses - are the courses for which the NESA develops a syllabus, setting out the objectives, outcomes, structure and content. NESA also sets Higher School Certificate examinations for most of these courses.
- NESA Content Endorsed Courses - all of which form part of an approved HSC program of study and are listed on your Record of Achievement. Content Endorsed Courses don't have a HSC examination, so therefor, cannot be used in the calculation of the ATAR.

Extension study is available in English, Mathematics, History, Music and some language courses. Extension courses build on the content of the 2-unit course, and require students to study beyond the 2-unit course. A second unit of Extension English and Mathematics may also be studied.

Assessment Marks

Your school submits your assessment marks for each NESA Board Developed Course studied to the NESA. These marks are calculated from your results on each assessment task you undertake as part of your HSC course and outlined in this booklet.

In the case of VET courses studied at school, there is no assessment mark. A student record of achievement for the competencies for each module is kept as a soft copy. **VET course competencies and outcomes are included in this booklet.**

School-Based Assessment

The assessment marks submitted by a school for each course are intended to indicate students' achievements relative to each other and the standards of the course. The assessment marks will be based on achievements measured at points throughout the course. This measure of students' achievements is based upon:

- *a wider range of syllabus outcomes than may be measured by the external examination, although it must cover all the outcomes measured by the examination;*
- *multiple measures and observations made throughout the HSC course rather than at a single, final examination.*

Measuring achievement at points during the course provides a better indication of student achievement than a single examination. It increases the accuracy of the final assessment of each student's achievement by using multiple measures. It caters for any knowledge and skills outcomes that are better assessed in specific settings (e.g. research, fieldwork or practical skills), thus broadening the base of the assessment.

Plagiarism

Plagiarism is when you present work or create work as yours that is the work or creation of someone else. Students should particularly note the definition and application of the rules found in the Koorringal High School Assessment Policy and in the NESA publication “All My Own Work” found at: <https://educationstandards.nsw.edu.au/wps/portal/nesa/11-12/hsc/about-HSC>.

Honesty in Assessment – the Standard

The honesty of students in completing assessment tasks, examinations and submitted works, and of teachers and others in guiding students, underpins the integrity of the Higher School Certificate. Throughout the assessment process, the highest level of honesty is required.

Each student’s mark will be determined by the quality of the work produced by the student only. Any component of a student’s work that has been written, created or developed by others must be acknowledged in accordance with the NESA subject-specific documentation. Use or inclusion of material from other sources, such as books, journals and electronic sources, including the internet, must be acknowledged. General teaching and learning do not require formal acknowledgement.

Dishonest behaviour carried out for the purpose of gaining unfair advantage in the assessment process constitutes malpractice, or cheating. Malpractice in any form, including plagiarism, is unacceptable. Koorringal High School treats allegations of malpractice very seriously and detected malpractice will limit a student’s marks and jeopardise their HSC.

Should malpractice be suspected, students will be required to demonstrate that all unacknowledged work is entirely their own. Serious and deliberate acts of malpractice amount to corrupt conduct and, where appropriate, students will be reported further. These requirements should be read in conjunction with NESA syllabuses and policies in related areas such as malpractice and satisfactory completion of a course. Details can be found on the NESA website: <https://educationstandards.nsw.edu.au/wps/portal/nesa/11-12/hsc/about-HSC>

NESA’s Responsibilities

For each course, NESA produces a syllabus, a statement of subject rules, a list of prescribed texts (if applicable), works and projects and an assessment guide. The NESA Higher School Certificate rules and requirements are covered in the Assessment, Certification and Examination (ACE) Manual. This and many other NESA publications, including syllabi, can be found on the NESA website: www.educationstandards.nsw.edu.au. It is recommended that students regularly access this site.

Review of Final Assessment Ranks

Following submission of assessment marks from the school in each HSC course and the completion of the HSC examinations, the NESA will provide students with their relative position in each course, through their NESA Students Online account.

If the position assigned by the school differs significantly from what was expected by a student, based on information provided during the course, the student may seek a review in that course. The teacher’s professional judgement of the achievement level in individual assessments as reflected in the marks or grades awarded, will not be considered in any part of the review.

Number of Assessment Tasks

It is not the intention of the NESA to distort the normal learning processes by the introduction of these assessments. For this reason, schools are advised to use the least number of measures possible to arrive at a fair assessment. It is deemed by NESA that up to 4 tasks should be sufficient for assessment.

Teachers will use other activities for diagnostic purposes and to establish success in the teaching/learning of a particular concept, topic or unit. These are essential parts of the course and should be carried out by all students. It should further be noted that not all tasks are weighted equally and a poor level of achievement in a major task may have significant consequences. At the same time, it should be recognised that significant variation in a student’s rank may occur during the HSC year as a consequence of relatively small mark differences.

Students, therefore, who take lightly their responsibility to submit their best work in all tasks, do so at serious risk. A pattern of non-serious attempt or non-attempt might well prejudice such student's eligibility to receive a Higher School Certificate.

Non-Assessment Tasks

Not all homework, assignments and tests provide assessment marks. The purpose of non-assessment tasks is to give you practice and so help you improve your result. You need to complete all your assigned work in order to have satisfactorily completed the course – not just the tasks specified for assessment. As these tasks are part of a course, their completion is required for you to meet course requirements.

Concerns

If you are experiencing any difficulty in assessments for a course you should seek help from your teacher, Year Advisor or the Head Teacher responsible for that course.

Satisfactory Completion of a Course

Course Completion Criteria

A student will be considered to have satisfactorily completed a course if, in the Principal's view, there is sufficient evidence that the student has:

- (a) **followed** the course developed or endorsed by NESAs; and
- (b) **applied** themselves with diligence and sustained effort to the set tasks and experiences provided in the course by the school; and
- (c) **achieved** some or all of the course outcomes.
- (d) VET Courses only – **completed** mandatory work placement of 70 hours.

While the NESAs do not mandate attendance requirements, Principals may determine that, as a result of absence or lack of sustained effort, the course completion criteria may not be met. Clearly, absences and lack of application will be regarded seriously by Principals who must give students early warning of the consequences of such circumstances. Warning letters must relate to students' meeting the completion of course requirements.

If at any time it appears that a student is at risk of being given an 'N' (Non-completion of course requirements) determination in any course, the Principal must warn the student as soon as possible and advise the parent or carer (if the student is under 18 years of age) in writing. This warning should be given in time for the problem to be corrected. If the first warning letter is not effective, a further warning letter(s) should be sent.

Students who have not complied with the above requirements cannot be regarded as having satisfactorily completed the course. The Principal will then apply the 'N' determination.

"For courses where school assessment marks are submitted, students must make a genuine attempt at assessment tasks which contribute in excess of 50 per cent of the available marks. It is emphasised that completion of assessment tasks worth exactly 50 per cent is not sufficient; tasks worth in excess of 50 per cent must be attempted. Furthermore, the student must fulfil the course completion criteria. It is only when both of these conditions are met that the course is listed on the Record of Achievement.

Until a student presenting for a Higher School Certificate has satisfactorily completed courses totalling at least 12 units of Preliminary courses and 10 units of HSC courses which satisfy the NESAs pattern of study requirements, the student will not be eligible to receive the award of a Higher School Certificate." (ACE Manual).

Disability Provisions

The NESAs assesses applications from students with special assessment needs in order to provide eligible students with practical support in NESAs assessments and examinations. Applications may be made by students for the RoSA, Preliminary HSC and Higher School Certificate according to procedures determined by the NESAs. The coordinators of these applications are the Head Teacher Wellbeing and the Learning Support Teacher. They will be able to provide Year 9 - 12 students with Disabilities Provisions Application forms and Information Guides. Students who wish to apply for disabilities provisions should see a member of the Learning Support Team.

Parents are encouraged to contact the Head Teacher Wellbeing or the Learning Support Teacher with any questions regarding the process. Parents will also be provided with the part of the form to be completed by any relevant specialists. It is most important that parents carry out this request in order to support the application with statements from medical professionals. The due date is always the last day of Term 1 for pre-existing conditions, except for applications based on chronic fatigue syndrome, post-viral syndrome, Ross River fever or glandular fever, which should be submitted in July of the examination year, with teacher comments and medical documentation also dated July.

For more details, refer to the NESA website on <https://www.educationstandards.nsw.edu.au/wps/portal/nesa/11-12/hsc/disability-provisions> or contact the school.

When an application is submitted, evidence must be included indicating the precise nature of the disability and the consequent effect on examination performance. Examples of provisions available include: braille or large-print papers, use of a writer and/or reader, use of an oral interpreter, extension of test time, rest breaks, separate examination supervision and permission to take medication. Schools are responsible for determining and approving disability provisions for all school-based assessment tasks. NESA only determines disability provisions for the Higher School Certificate examinations. Students and parents should be aware that there is no guarantee NESA will grant the same provisions as those given at school. Supporting documents, e.g. medical reports that confirm diagnosis of a particular condition; hearing and vision tests; timed essays should be submitted with the application. Supporting documentation should be less than 12 months old except where an existing medical condition/ diagnosis will not change with time, e.g. permanent vision loss, diabetes. Provisions for emergencies (e.g. a broken arm) may be sought up to the day of the examination. If all the necessary information is not provided, some requested provisions will be declined due to insufficient evidence.

Where a student has a condition that may or may not occur during an examination, such as migraines or asthma, the occurrence of an episode during an examination is covered by illness/misadventure appeals, not disability provisions. Also, disability provisions cannot compensate students for difficulties in undertaking a course or for lost preparation time. However, if there are identifiable factors known to contribute to or trigger a particular condition, an application can be submitted on this basis; for example, separate supervision in a room with natural light if bright lighting frequently results in a migraine.

Students may need provisions for:

- a permanent condition, such as diabetes or reading difficulty
- a temporary condition, such as a broken arm, or
- an intermittent condition, such as back pain when sitting for long periods.

NESA does not consider the lack of familiarity with the English language to be a disability in this context. Therefore, provisions such as the use of an English/foreign language dictionary will not be approved for students disadvantaged solely because of lack of familiarity with the English language.

Where a student has a condition that might manifest itself during an examination session (e.g. epilepsy or asthma), the occurrence of an episode during the examination will be covered by the illness/misadventure provisions.

Students for whom disability provisions are approved may not be eligible for illness/misadventure consideration for the same condition unless they experience a deterioration or variation in their condition during the actual examinations.

Common Grade Scale for Preliminary Courses

The Common Grade Scale describes performance at each of five grade levels.

Grade A	The student has an extensive knowledge and understanding of the content and can readily apply this. The student demonstrates extensive knowledge of content and understanding of course concepts, and applies highly developed skills and processes in a wide variety of contexts. In addition the student demonstrates creative and critical thinking skills using perceptive analysis and evaluation. The student effectively communicates complex ideas and information.
Grade B	The student demonstrates thorough knowledge of content and understanding of course concepts, and applies well-developed skills and processes in a variety of contexts. In addition the student demonstrates creative and critical thinking skills using analysis and evaluation. The student clearly communicates complex ideas and information.
Grade C	The student demonstrates sound knowledge of content and understanding of course concepts, and applies skills and processes in a range of familiar contexts. In addition the student demonstrates skills in selecting and integrating information and communicates relevant ideas in an appropriate manner.
Grade D	The student demonstrates a basic knowledge of content and understanding of course concepts, and applies skills and processes in some familiar contexts. In addition the student demonstrates skills in selecting and using information and communicates ideas in a descriptive manner.
Grade E	The student demonstrates an elementary knowledge of content and understanding of course concepts, and applies some skills and processes with guidance. In addition the student demonstrates elementary skills in recounting information and communicating ideas.

This Preliminary Assessment Information and Schedule should be read in conjunction with the Koorimal High School Assessment Policy.

Individual Preliminary Course Assessment Schedules

Board Developed Courses

Agriculture

Outcomes

- P1.1** describes the complex, dynamic and interactive nature of agricultural production systems
- P1.2** describes the factors that influence agricultural systems
- P2.1** describes the biological and physical resources and applies the processes that cause changes in plant production systems
- P2.2** describes the biological and physical resources and applies the processes that cause changes in animal production systems
- P2.3** describes the farm as a basic unit of production
- P3.1** explains the role of decision-making in the management and marketing of agricultural products in response to consumer and market requirements
- P4.1** applies the principles and procedures of experimental design and agricultural research
- P5.1** investigates the role of associated technologies and technological innovation in producing and marketing agricultural products

Ancient History

Outcomes

- AH11-1** describes the nature of continuity and change in the ancient world
- AH11-2** proposes ideas about the varying causes and effects of events and developments
- AH11-3** analyses the role of historical features, individuals and groups in shaping the past
- AH11-4** accounts for the different perspectives of individuals and groups
- AH11-5** examines the significance of historical features, people, places, events and developments of the ancient world
- AH11-6** analyses and interprets different types of sources for evidence to support an historical account or argument
- AH11-7** discusses and evaluates differing interpretations and representations of the past
- AH11-8** plans and conducts historical investigations and presents reasoned conclusions, using relevant evidence from a range of sources
- AH11-9** communicates historical understanding, using historical knowledge, concepts and terms, in appropriate and well-structured forms
- AH11-10** discusses contemporary methods and issues involved in the investigation of ancient history

Community and Family Studies

Outcomes

- P1.1** describes the contribution an individual's experiences, values, attitudes and beliefs make to the development of goals
- P1.2** proposes effective solutions to resource problems
- P2.1** accounts for the roles and relationships that individuals adopt within groups
- P2.2** describes the role of the family and other groups in the socialisation of individuals
- P2.3** examines the role of leadership and group dynamics in contributing to positive interpersonal relationships and achievement
- P2.4** analyses the interrelationships between internal and external factors and their impact on family functioning
- P3.1** explains the changing nature of families and communities in contemporary society
- P3.2** analyses the significance of gender in defining roles and relationships
- P4.1** utilises research methodology appropriate to the study of social issues
- P4.2** presents information in written, oral and graphic form
- P5.1** applies management processes to maximise the efficient use of resources
- P6.1** distinguishes those actions that enhance wellbeing
- P6.2** uses critical thinking skills to enhance decision making

Drama

Outcomes

- P1.1** develops acting skills in order to adopt and sustain a variety of characters and roles
- P1.2** explores ideas and situation, expressing them imaginatively in dramatic form
- P1.3** demonstrates performance skills appropriate to a variety of styles and media
- P1.4** understands, manages and manipulates theatrical elements and elements of production, using them perceptively and creatively.
- P1.5** understands, demonstrates and records the process of developing and refining ideas and script through to performance
- P1.6** demonstrates directorial and acting skills to communicate meaning through dramatic actions
- P2.1** understands the dynamics of actor-audience relationship
- P2.2** understands the contributions to a production of the playwright, director, dramaturg, designers, front-of-house staff, technical staff and producers
- P2.3** demonstrates directorial and acting skills to communicate meaning through dramatic action
- P2.4** performs effectively in a variety of styles using a range of appropriate performance techniques, theatrical and design elements and performance spaces
- P3.1** critically appraises and evaluates, both orally and in writing, personal performances and the performances of others
- P3.2** understands the variety of influences that have impacted upon drama and theatre performance styles, structures and techniques
- P3.3** analyses and synthesises research and experiences of dramatic and theatrical styles, traditions and movements

Design and Technology

Outcomes

- P1.1 examines design theory and practice, and considers the factors affecting designing and producing in design projects
- P2.1 identifies design and production processes in domestic, community, industrial and commercial settings
- P2.2 explains the impact of a range of design and technology activities on the individual, society and the environment through the development of projects
- P3.1 investigates and experiments with techniques in creative and collaborative approaches in designing and producing
- P4.1 uses design processes in the development and production of design solutions to meet identified needs and opportunities
- P4.2 uses resources effectively and safely in the development and production of design solutions
- P4.3 evaluates the processes and outcomes of designing and producing
- P5.1 uses a variety of management techniques and tools to develop design projects
- P5.2 communicates ideas and solutions using a range of techniques
- P5.3 uses a variety of research methods to inform the development and modification of design ideas
- P6.1 investigates a range of manufacturing and production processes and relates these to aspects of design projects
- P6.2 evaluates and uses computer-based technologies in designing and producing

Engineering

Outcomes

- P1.1 identifies the scope of engineering and recognises current innovations
- P1.2 explains the relationship between properties, structure, uses and applications of materials in engineering
- P2.1 describes the types of materials, components and processes and explains their implications for engineering development
- P2.2 describes the nature of engineering in specific fields and its importance to society
- P3.1 uses mathematical, scientific and graphical methods to solve problems of engineering practice
- P3.2 develops written, oral and presentation skills and applies these to engineering reports
- P3.3 applies graphics as a communication tool
- P4.1 describes developments in technology and their impact on engineering products
- P4.2 describes the influence of technological change on engineering and its effect on people
- P4.3 identifies the social, environmental and cultural implications of technological change in engineering
- P5.1 demonstrates the ability to work both individually and in teams
- P5.2 applies management and planning skills related to engineering
- P6.1 applies knowledge and skills in research and problem-solving related to engineering
- P6.2 applies skills in analysis, synthesis and experimentation related to engineering

Outcomes

- P1.1** describes the organisation and management of an individual business within the focus area industry
- P1.2** identifies appropriate equipment, production and manufacturing techniques, including new and developing technologies
- P2.1** describes and uses safe working practices and correct workshop equipment maintenance techniques
- P2.2** works effectively in team situations
- P3.1** sketches, produces and interprets drawings in the production of projects
- P3.2** applies research and problem-solving skills
- P3.3** demonstrates appropriate design principles in the production of projects
- P4.1** demonstrates a range of practical skills in the production of projects
- P4.2** demonstrates competency in using relevant equipment, machinery and processes
- P4.3** identifies and explains the properties and characteristics of materials/components through the production of projects
- P5.1** uses communication and information processing skills
- P5.2** uses appropriate documentation techniques related to the management of projects
- P6.1** identifies the characteristics of quality manufactured products
- P6.2** identifies and explains the principles of quality and quality control

Investigating Science

Outcomes	
INS11/12-1	develops and evaluates questions and hypotheses for scientific investigation
INS11/12-2	designs and evaluates investigations in order to obtain primary and secondary data and information
INS11/12-3	conducts investigations to collect valid and reliable primary and secondary data and information
INS11/12-4	selects and processes appropriate qualitative and quantitative data and information using a range of appropriate media
INS11/12-5	analyses and evaluates primary and secondary data and information
INS11/12-6	solves scientific problems using primary and secondary data, critical thinking skills and scientific processes
INS11/12-7	communicates scientific understanding using suitable language and terminology for a specific audience or purpose
INS11-8	identifies that the collection of primary and secondary data initiates scientific investigations
INS11-9	examines the use of inferences and generalisations in scientific investigations
INS11-10	develops, and engages with, modelling as an aid in predicting and simplifying scientific objects and processes

Legal Studies

Outcomes

- P1** identifies and applies legal concepts and terminology
- P2** describes the key features of Australian and international law
- P3** describes the operation of domestic and international legal systems
- P4** discusses the effectiveness of the legal system in addressing issues
- P5** describes the role of law in encouraging cooperation and resolving conflict, as well as initiating and responding to change
- P6** explains the nature of the interrelationship between the legal system and society
- P7** evaluates the effectiveness of the law in achieving justice
- P8** locates, selects and organises legal information from a variety of sources including legislation, cases, media, international instruments and documents
- P9** communicates legal information using well-structured responses

Outcomes

- MA11-1** uses algebraic and graphical techniques to solve, and where appropriate, compare alternative solutions to problems
- MA11-2** uses the concepts of functions and relations to model, analyse and solve practical problems
- MA11-3** uses the concepts and techniques of trigonometry in the solution of equations and problems involving geometric shapes
- MA11-4** uses the concepts and techniques of periodic functions in the solutions of trigonometric equations or proof of trigonometric identities
- MA11-5** interprets the meaning of the derivative, determines the derivative of functions and applies these to solve simple practical problems
- MA11-6** manipulates and solves expressions using the logarithmic and index laws, and uses logarithms and exponential functions to solve practical problems
- MA11-7** uses concepts and techniques from probability to present and interpret data and solve problems in a variety of contexts, including the use of probability distributions

Music 1

Outcomes

- P1** performs music that is characteristic of the topics studied
- P2** observes, reads, interprets and discusses simple musical scores characteristic of topics studied
- P3** improvises and creates melodies, harmonies and rhythmic accompaniments for familiar sound sources reflecting the cultural and historical contexts studied
- P4** recognises and identifies the concepts of music and discusses their use in a variety of musical styles
- P5** comments on and constructively discusses performances and compositions
- P6** observes and discusses concepts of music in works representative of the topics studied
- P7** understands the capabilities of performing media, explores and uses current technologies as appropriate to the topics studied
- P8** identifies, recognises, experiments with and discusses the use of technology in music
- P9** performs as a means of self-expression and communication
- P10** demonstrates a willingness to participate in performance, composition, musicology and aural activities
- P11** demonstrates a willingness to accept and use constructive criticism

Personal Development, Health and Physical Education

Outcomes

- P1** identifies and examines why individuals give different meanings to health
- P2** explains how a range of health behaviours affect an individual's health
- P3** describes how an individual's health is determined by a range of factors
- P4** evaluates aspects of health over which individuals can exert some control
- P5** describes factors that contribute to effective health promotion
- P6** proposes actions that can improve and maintain an individual's health
- P7** explains how body systems influence the way the body moves
- P8** describes the components of physical fitness and explains how they are monitored
- P9** describes biomechanical factors that influence the efficiency of the body in motion
- P10** plans for participation in physical activity to satisfy a range of individual needs
- P11** assesses and monitors physical fitness levels and physical activity patterns
- P12** demonstrates strategies for the assessment, management and prevention of injuries in first aid settings
- P13** develops, refines and performs movement compositions in order to achieve a specific purpose (Option 2)
- P14** demonstrates the technical and interpersonal skills necessary to participate safely in challenging outdoor recreation activities
- P15** forms opinions about health-promoting actions based on a critical examination of relevant information
- P16** uses a range of sources to draw conclusions about health and physical activity concepts
- P17** analyses factors influencing movement and patterns of participation

Physics

Outcomes

- PH11/12-1** develops and evaluates questions and hypotheses for scientific investigation
- PH11/12-2** designs and evaluates investigations in order to obtain primary and secondary data and information
- PH11/12-3** conducts investigations to collect valid and reliable primary and secondary data and information
- PH11/12-4** selects and processes appropriate qualitative and quantitative data and information using a range of appropriate media
- PH11/12-5** analyses and evaluates primary and secondary data and information
- PH11/12-6** solves scientific problems using primary and secondary data, critical thinking skills and scientific processes
- PH11/12-7** communicates scientific understanding using suitable language and terminology for a specific audience or purpose
- PH11-8** describes and analyses motion in terms of scalar and vector quantities in two dimensions and makes quantitative measurements and calculations for distance, displacement, speed velocity and acceleration
- PH11-9** describes and explains events in terms of Newton's Laws of Motion, the law of conservation of momentum and the law of conservation of energy
- PH11-10** explains and analyses waves and the transfer of energy by sound, light and thermodynamic principles
- PH11-11** explains and quantitatively analyses electric fields, circuitry and magnetism

Individual Preliminary VET Information

HSC Assessment Advice for VET Courses

Assessment in VET courses is competency based. This means that you need to demonstrate that you have gained and can apply the specific knowledge and skills for the unit of competency to be deemed competent in that unit. Evidence of competence will be collected in a variety of ways including written tasks, practical demonstration, portfolio or assignments.

You will be deemed “Competent” if performance in all required assessment activities for the unit of competency is satisfactory or Not Competent if you are still developing skills and/or your performance is at an unsatisfactory level. There is no pass or fail. This means that a course mark is not allocated. For this reason, the assessment schedule for HSC VET courses is in a different format to other NESA Courses.

Formal assessment will be scheduled only when you have developed the necessary skills and underpinning knowledge to demonstrate competency.

Your trainer will keep an outcome record of units of competency. You may request to see this record at any time to determine your progress. Alternately you will be supplied with a competency log for maintaining a record of units achieved. You are entitled to seek advice about options for further training and assessment for competencies ‘not achieved’. Refer to the Student Guide for additional advice. You will also receive a report from the school each semester indicating competency achievement. Competencies cannot be recorded without the sufficient assessment evidence.

The achievement of competency in the units of competency as stated in the Training and Assessment Strategy (TAS) will lead to a Certificate at AQF level I, II or III or a Statement of Attainment towards the AQF qualification. A digital transcript will be issued by the NSW Education Standards Authority (NESA) on behalf of Public Schools NSW Wagga Wagga, Registered Training Organisation (RTO) 90333 for successful completion. Refer to your NESA Student Online profile for more information.

Recognition of Prior Learning (RPL) on the Wagga Wagga RTO RPL form with the portfolio of evidence relevant to each unit of competency for which RPL is requested. The RPL form and evidence portfolio must be submitted to your trainer prior to course commencement who will forward it to the RTO manager for review.

Credit Transfer (CT) may be given for a unit of competency (UoC) previously achieved with another RTO after verification of the UoC. Seek CT advice from your trainer, who will contact the RTO, prior to the commencement of the delivery of this UoC.

N Determination letters will be issued to students who do not demonstrate due diligence and sustained effort in the course, participate in mandatory work placement and or apply themselves to course outcomes. This process may then lead to an “N” determination for this subject which may prevent the achievement of the HSC. Warning letters will not be issued for failure to achieve competency but are about fulfilling the requirements of learning for the HSC.

Work placement is a mandatory HSC component in some courses and must be completed during the course. (Refer to the specific course assessment summary for more detailed information).

- you will not be permitted to participate in a work placement if you are not deemed ‘work ready’ by your trainer.
- a ‘N’ determination will be issued if work placement is not satisfactorily completed. This means that the course will not count towards your HSC pattern of study. However, you will still receive a Certificate or Statement of Attainment which indicates one or more unit/s of competency achieved towards the qualification.
- the scheduled date for work placement is shown in the course assessment summary.
- you will complete a workplace journal of your placement.

Work placement advice from NESA in response to COVID

<https://educationstandards.nsw.edu.au/wps/portal/nesa/about/news/novel-coronavirus/vet-work-placement>

HSC Examination is only available in some VET courses. (Refer to the NESA course outline and the specific course assessment summary for detailed information).

- Optional for students completing the 240 hour course and is intended for Australian Tertiary Admissions Rank (ATAR) purposes only. (Refer to the specific course assessment summary for more detailed information).
- Independent of the competency based assessment requirements for the Australian Qualifications Framework (AQF) VET qualification. The satisfactory completion of the course will still appear on your HSC if the optional exam is not undertaken. If you intend to use your VET course towards the calculation of the ATAR, the school must submit an estimated mark of your likely performance in the HSC examination. The calculation of the mark is a school decision and will include the Trial HSC examination. This mark is only used in the event of misadventure.

Cluster 2 Safe and Sound	CUAWHS312 CUASOU331	Apply work health and safety practices Undertake live audio operations	X	X	X	Mandatory Mandatory
Cluster 3 Bump in the Light	CUALGT311 CUASTA212	Operate basic lighting Assist with bump in and bump out of shows	X	X	X	Mandatory –
Cluster 4 Working in the Industry	CUAIND311	Work effectively in the creative arts industry	X	X	X	Mandatory
Cluster 5 To Project and Serve	SITXCCS006 CUASOU306 CUAVSS312	Provide service to customers Operate sound reinforcement systems Operate vision systems	X	X	X	Mandatory – Mandatory
Cluster 6 Show Time	CUASTA311 CUASMT311 CUAIND314	Assist with production operations for live performances Work effectively backstage during performances Plan a career in the creative arts industry	X	X	X	Mandatory – –
Cluster 7 60 Hours Specialisation	CUAPPR314 BSBPEF301 CUFLGT314	Participate in collaborative creative projects Organise personal work priorities and Install and operate follow spots development	X	X	X	– – –

You must satisfactorily meet all the requirements of the VET qualification as stated in the TAS to achieve the CUA30420 Certificate III in Live Production and Technical Services including the 60 hour Specialisation Study. The Statement of Attainment towards CUA30420 Certificate III in Live Production and Technical Services will only be the possible AQF outcome if at least one UoC has been achieved

Assessment Summary for Manufacturing and Engineering Introduction:

MEM10119 Certificate I in Engineering and

Statement of Attainment towards MEM20413 Certificate II in Engineering Pathways.

Requirements for HSC purposes	Dates
Work Placement (compulsory for the HSC) 35 hours in total	Term 3, Week 3 or 4 (Year 11) Term 1, Week 5 or 6 (Year 12) Only one 35hr week required
There is NO HSC Examination available in this Board Endorsed Course. This VET course cannot be used in the calculation of an ATAR	NA

Assessment Plan			Evidence Collection			
Cluster	Competency codes	Title of competency	Written Task/Questioning – written or oral related to knowledge e.g. quizzes, interviews	Direct observation – real time, simulated environment	Product based method – structured activities e.g. role plays, work samples, presentation, reports	Portfolio – purposeful collection of annotated and validated pieces of evidence compiled by the learner work samples, photos, videos, logbooks
Cluster 1 – Welcome to the Industry	MEM13015	Work safely and effectively in manufacturing and engineering				
	MEM16006	Organise and communicate information	X	X	X	
	MEM11011	Undertake manual handling				
Cluster 2 – Right tool, Right job	MEM18001	Use hand tools	X	X	X	
	MEM18002	Use power tools/hand held operations				
Cluster 3 – Engineering in Practice	MEM12024	Perform computations				
	MEM16008	Interact with computer technology	X	X	X	
	MEM07032	Use workshop machines for basic operations				
Cluster 4 – Can we build it	MEMPE006A	Undertake a basic engineering project	X	X	X	X
	MEMPE001A	Use engineering workshop machines				
Cluster 5 – Sparks and Noise	MEMPE002A	Use Electric welding machines	X	X		
	MEMPE004A	Use fabrication equipment				
Cluster 6 – My pathway	MEMPE005A	Develop a career plan for the engineering and manufacturing industry	X		X
