

BIOLOGY AND SENIOR SCIENCE SOUTH COAST EXCURSION

This is a **mandatory** component of your Prelim Course!

[If you are unable to go you need to speak to your teacher ASAP]

Expression of interest

As part of the Preliminary Biology and Senior Science Course students are required to undertake a mandatory Field Study of a local ecosystem.

We have decided to conduct the field study at Minnamurra Falls and also incorporate several other aspects of the syllabus into the excursion (such as identifying plant and animal adaptations from the local ecosystem and constructing food webs using a rock platform.

There is no other way to describe this assignment other than use the word *brilliant!*

There is a cost of **\$200** for the excursion, which includes the fees for the campsite, food, national park entry fees and bus→ this may change however depending on the number of students.

There is an additional expense of **\$28** if your child wants to take part in the Nowra Tree Top Adventure (6 courses of varying difficulty with 77 challenges).

<http://treesadventure.com.au/nowra-shoalhaven> (Check the website for more detail).

At this point we are seeking an expression of interest to undertake the excursion on Wednesday 15th February till Friday 17th February, 2017 (Week 4 Term 1 2017).
